DEL CARLO GROUP

The Del Carlo Group is today a well-established reality on the national and international scene thanks to the tradition of the units that compose it, which have their roots back in 1950 with the birth of the first hot galvanizing company and in 1960 with the first factory for the production of poles. Today the leading group on the market in the field of galvanizing, painting and processing of steel with a total production area of 170,000 square meters is the head of a district of Italian companies of excellence: Lorenzo Del Carlo, Metalzinco, CML and Macofer, specialized in the various stages of processing. | www.delcarlogroup.it

CML

The CML s.r.l. founded in 1950, thanks to the development of advanced technologies in the field of design and production of steel supports and accessories for public and private lighting, it is today at the top of the national and European market. CML thanks to its decades of experience in the production of lighting supports and for the transport of electricity, is now able to offer a wide range of products, developed thanks to full and continuous attention to market developments and availability for the design of new and different solutions that best fit the needs and demands of the customer. It is also a Del Carlo Group company, together with a district of Italian companies of excellence | www.cmlpoli.it
